## **EXAMPLES OF SPECIFIC JOB USE**

### **COBBLESTONE SURFACE AREAS**

Similar to concrete cleaning with Rotomajic surface cleaner however, pre-treating with Moss and Lichen Killer may be necessary.

Take care not to flush bedding sand away as this needs to go back between the cobbles to prevent movement. Using a rubber skirt on the Rotomajic assists with this.

Cobblestone areas should not be waterblasted with a gun as this is too harsh on the cobbles and blasts away the sand between the blocks.
